## Lightbridge Selected to Present at CleanEquity® Monaco 2018

LONDON, March 5, 2018 /PRNewswire/ -- **Lightbridge Corporation (NASDAQ: LTBR)**, a nuclear fuel technology company, will present at CleanEquity® Monaco 2018 on 8th & 9th March at the Fairmont Monte Carlo.

CleanEquity® is an annual invitation-only event hosted by Innovator Capital, the London based specialist investment bank. The conference provides an intimate and collegiate setting for inventors and entrepreneurs to share their stories with delegates - key decision makers looking to assist them with reaching their commercial and strategic goals.

Partners and sponsors include Prince Albert II of Monaco's Foundation, Cohesion Investments, Covington & Burling, Cision, Cranfield University, easyGroup, Hobbs & Towne, the Monaco Economic Board, Parkview, Shell Foundation and STRATIS Impact.

Lightbridge has been identified by an expert panel as one of the world's most innovative sustainable technology companies and has been selected to present to selected sovereign, corporate, family and professional investors, policy makers, end users and international trade media.

### About Lightbridge Corporation

Lightbridge (NASDAQ: LTBR) is a nuclear fuel technology development company based in Reston, Virginia, USA. The Company develops proprietary next generation nuclear fuel technologies for current and future reactors, which significantly enhances the economics and safety of nuclear power, operating about 1000° C cooler than standard fuel. In January 2018, Lightbridge and Framatome, Inc. formed a 50-50 joint venture, Enfission, LLC, to develop, license, manufacture, and sell nuclear fuel assemblies based on Lightbridge-designed metallic fuel technology and other advanced nuclear fuel intellectual property. Enfission has the exclusive rights to this technology and is responsible for the development of manufacturing processes and fuel assembly designs for pressurized water reactors (PWRs), boiling water reactors (BWRs), water-cooled small modular reactors, and water-cooled research reactors developed around this intellectual property. PWRs and BWRs constitute the most widely used reactor types in the world. Four large electric utilities that generate about half the nuclear power in the US already advise Lightbridge on fuel development and deployment. In addition to distributions from Enfission based on the parties' ownership interest in the joint venture, Lightbridge anticipates receiving future licensing revenues in connection with sales by Enfission of nuclear fuel incorporating its intellectual property. Lightbridge also provides comprehensive advisory services for established and emerging nuclear programs based on a philosophy of transparency, non-proliferation, safety and operational excellence.
